- Testing Plan

- Test that all buttons route to specific page
 - “View Restaurants” goes to restaurant structure.
- Test that orders come in accurately.
 - Assert that faux order matches with reality.
- Approve and Deny
 - Test that pressing either button removes from queue and marks order in pat order appropriately
- Order correctness
 - Test that orders have appropriate values
 - Ints and doubles where they’re supposed to be.
 - Test that orders with null values are automatically denied
